

SAFETY DATA SHEET (SDS)

Section 1. Identification					
Product identifier	LP-2000				
Other means of identification 22340; 22340S;		22340; 2234	OS;		
Recommended use and restrictions on use Anti-		ions on use	ti-wear and extreme pressure lubricant and penetrant. 142 g/340 g aerosol container.		
Initial supplier identifier Asalco Inc. 44, ch. Des Ursulines, Stanstead, Québec (Canada), JOB 3E0		ch. Des Ursulines, Stanstead, Québec (Canada), J0B 3E0			
Telephone 819-876-2211; Fax 819-876-5373; Internet www.asalco.com					
Emergency telephone number/restriction on use		restriction on	se Canada – CANUTEC 24 hour number 613-996-6666		

Section 2. Hazard identification

Classification of hazardous product (name of the category or subcategory of the hazard class)

Extremely flammable aerosol (Category 1)

Gas under pressure (compressed gas)

Skin irritation (Category 2)

Eve irritation (Category 2A)

Sensitization – Skin (Category 1)

Aspiration hazard (Category 1)

Specific target organ toxicity – single exposure (Category 3), Central nervous system

Information elements (symbols, signal words, hazard statements and precautionary statements of the category/subcategory)

Danger

H222 Extremely flammable aerosol.

H229 Pressurized container: may burst if heated.

H280 Contains gas under pressure; may explode if heated.

H304 May be fatal if swallowed and enters airways.

H315 Causes skin irritation.

Other hazards known

H317 May cause an allergic skin reaction.

H319 Causes serious eye irritation.

H336 May cause drowsiness or dizziness.

*** May displace oxygen and cause rapid suffocation. P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. P211 Do not spray on an open flame or other ignition source. P251 Do not pierce or burn, even after use. P261 Avoid breathing dust/fume/gas/mist/vapours/spray. P264 Wash hands/nails/face thoroughly after handling. P271 Use only outdoors or in a well-ventilated area. P272 Contaminated work clothing should not be allowed out of the workplace. P280 Wear protective gloves/ protective clothing/ eye protection/ face protection. P301+P310 IF SWALLOWED: Immediately call a doctor. P331 DO NOT INDUCE VOMITING. P302+P352 IF ON SKIN, Wash with plenty of water for several minutes. P332 + P313 If skin irritation occurs: Get medical attention. P333 + P313 IF SKIN irritation or rash occurs: Get medical attention. P362+P364 Take off contaminated clothing and wash it before reuse. P305+P351+P338 IF IN EYES, Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P337 + P313 If eye irritation persists: Get medical attention. P304 + P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing. P312 Call a doctor if you feel unwell. P410+P403+P233 Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F. Store in a well-ventilated area. Keep container tightly closed. P405 Store locked up. P501 Dispose of contents/container into safe container in accordance with local, regional or national regulations.

Simple Asphysiants (Category 1) A gas that is a simple asphysiant***

Other nazarus known	Shiple Asphysiants (Category 1) A gas that is a shiple asphysiant					
Section 3. Composition/information on ingredients						
Chemical name (common	name/synonyms)	CAS number or other	Concentration (%)			
Hydrotreated, heavy naphthenic distillate		64742-52-5	15-40			
D-Limonene		5989-27-5	< 5			
Solvent naphtha, medium al	iphatic	64742-88-7	< 10			
Stoddard solvent (Petroleun	n distillate)	8052-41-3	< 15			
Acetone		67-64-1	< 5			
Isobutane		75-28-5	< 5			
Propane		74-98-6	< 15			
1,2,3-Trimethylbenzene		526-73-8	< 5			
Triphenyl phosphite		101-02-0	< 1			
Diphenylamine		122-39-4	< 1			
* Statement - This safety data sheet provides concentration range(s) instead of the actual concentration(s) considered trade secret(s).						

Section 4. First-aid measures					
Inhalation	IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a doctor if you feel unwell.				
Ingestion	IF SWALLOWED: Immediately call a doctor. DO NOT INDUCE VOMITING. NEVER give anything by mouth if				
	victim is rapidly losing consciousness, or is unconscious or convulsing. Rinse mouth thoroughly with water. Have				
	victim drink two glasses of water. If vomitin	g occurs naturally, have victim lean forward to reduce risk of aspiration.			
Skin contact	IF ON SKIN, Wash with plenty of water for	several minutes (15-20). If skin irritation occurs: Get medical attention.			
Eye contact	IF IN EYES, Rinse cautiously with water for several minutes (15-20). Remove contact lenses, if present and easy to				
	do. Continue rinsing. If eye irritation persists: Get medical attention.				
Most important symptoms and effects (acute or delayed) Eye or skin irritation.		Eye or skin irritation.			
Indication of immediate medical attention/special treatment		In all cases, call a doctor. Do not forget this document.			

Section 5. Fire-fighting measures

Specific hazards of the hazardous product (hazardous combustion products)

Carbon oxides and other irritant/toxic gases and fumes.

Suitable and unsuitable extinguishing media

In case of fire: Use carbon dioxide, chemical powder agent and appropriate foam to extinguish surrounding products.

Special protective equipment and precautions for fire-fighters

During a fire, irritating/toxic smoke and fumes may be generated. Do not enter fire area without proper protection. Firefighters should wear proper protective equipment and self-contained breathing apparatus with full facepiece. Shield personnel to protect from venting, rupturing or bursting cans. Move containers from fire area if it can be done without risk. Water spray may be useful in cooling equipment and cans exposed to heat and flame.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. All persons dealing with clean-up should wear the appropriate protective equipment (See Section 8).

Methods and materials for containment and cleaning up

Ventilate area of release. Stop the leak if it can be done safely. Contain and absorb any spilled liquid concentrate with inert absorbent material, then place material into a container for later disposal (see Section 13). Contaminated absorbent material may pose the same hazards as the spilled product. Notify the appropriate authorities as required.

Section 7. Handling and storage

Precautions for safe handling

Wear protective gloves/ protective clothing/ eye protection/ face protection. Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Use only outdoors or in a well-ventilated area.

Before handling, it is very important that engineering controls are operating, and that protective equipment requirements and personal hygiene measures are being followed. People working with this chemical should be properly trained regarding its hazards and its safe use. Inspect containers for leaks before handling. Label containers appropriately. Ensure proper ventilation. Do not breathe dust/fume/gas/mist/vapours/spray. Avoid contact with eyes, skin and clothing. Keep away from heat, sparks and flame. Avoid generating high concentrations of dusts, vapours or mists. Keep away from incompatible materials (Section 10). Keep containers closed when not in use. Empty containers are always dangerous. Refer also to Section 8. Keep out of reach of children.

Conditions for safe storage, including any incompatibilities

Store in a well-ventilated place. Keep container tightly closed. Keep cool. Store locked up. Store away from incompatible materials (Section 10). Inspect all incoming containers to make sure they are properly labelled and not damaged. Storage area should be clearly identified, clear of obstruction and accessible only to trained personnel. Inspect periodically for damage or leaks.

Section 8. Exposure controls/Personal protection

Control parameters (biological limit values or exposure limit values and source of those values)

Exposure limits: CAS 74-98-6 & 75-28-5 – ACGIH – TLV-TWA (STEL) and/or PEL-TWA 1000 ppm; CAS 8052-41-3 – ACGIH – TLV-TWA 100 ppm & PEL-TWA 500 ppm; CAS 67-64-1 – ACGIH – TLV-TWA 500 ppm & TLV-STEL 750 ppm;

Appropriate engineering controls

Use under well-ventilated conditions. Local exhaust ventilation system is recommended to maintain concentrations of contaminants below exposure limits. Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.

Individual protection measures/personal protective equipment

Respiratory protection is required if the concentrations are higher than the exposure limits. Use a NIOSH approved respirators if the exposure limits are unknown. Chemically protective gloves (impervious), and other protective clothing to prevent prolonged or repeated skin contact, must be worn during all handling operations. Wear protective chemical splash goggles to prevent mists from entering the eyes. Wash hands/nails/face thoroughly after handling. Do not eat, drink or smoke when using this product. Practice good personal hygiene after using this material. Remove and wash contaminated work clothing before re-use.

Environmental hazards (IMDG or other)

Bulk transport (usually more than 450 L in capacity) Not possible

DATE & VERSION – MARCH 03, 2021 VERSION 02.					
Section 9. Physical and chemical properties					
Appearance, physical state/colour Clear	liquid (aerosol)	Vapour press		Not available	
Odour Petroleum	,	Vapour dens	sitv	Heavier than air	
Odour threshold Not available	Relative dens		~0.3		
pH Not available	Solubility Not available				
Melting/freezing point Not available			Partition coefficient - n-octanol/water Not available		
Initial boiling point/range Not available		Auto-ignition temperature Not available			
Flash point Not available (flame projection	> 15 cm & no flashback)		Decomposition temperature Not available		
Evaporation rate Not available	<u> </u>	Viscosity Not available			
	y flammable aerosol	VOC Not available			
Upper and lower flammability/explosive lim		Other None known			
*	Section 10. Stability	and reactivit	tv		
Reactivity					
Does not react under the recommended storage	and handling conditions prescri	ibed.			
Chemical stability	-				
Stable under the recommended storage and hand	lling conditions prescribed.				
Possibility of hazardous reactions	•				
· · · · · · · · · · · · · · · · · · ·	en flames and other ignition so	ources. Do not s	spray on	an open flame or other ignition source. Do not
