Move containers from fire area if it can be done without risk. Water spray may be useful in cooling equipment and cans exposed to heat and flame.

Section 6. Accidental release measures				
Personal precautions, protective equipment and emergency procedures				
Restrict access to area until completion of clean-up. Ensure clean-up is co	onducted by trained personnel only. All persons dealing with clean-up			
should wear the appropriate protective equipment (See Section 8).				
Methods and materials for containment and cleaning up				
Ventilate area of release. Stop the leak if it can be done safely. Contain and	absorb any spilled liquid concentrate with inert absorbent material, then			
place material into a container for later disposal (see Section 13). Contaminate				
Notify the appropriate authorities as required.				
Section 7. Handling and storage				
Precautions for safe handling				
Wear protective gloves/ protective clothing/ eye protection/ face protection. Protect from sunlight. Do not expose to temperatures exceeding 50				
°C/122 °F. Keep away from heat/sparks/open flames/hot surfaces No smoking. Do not pierce or burn, even after use. Use only outdoors or in a				
well-ventilated area.				
Before handling, it is very important that engineering controls are operatin				
measures are being followed. People working with this chemical should
